

YourDrive Mobile App Client Test Script

Device / OS: _____ Tester: _____ Date: _____

How to use this document

Work through each section in order. For every test case:

- Follow the **Steps** exactly as written.
- Compare what you see to the **Expected result**.
- Mark the **Status** column: **PASS**, **FAIL**, **BLOCKED** (cannot run), or **N/A** (feature not needed).
- If **FAIL**, write what actually happened in **Notes** and attach a screenshot if possible.

Legend used in "Status" columns:

- ☐ not tested yet
- ☒ tested — record result next to it

2. Sign Up Flow

#	Test case	Steps	Expected result	Status	Notes
2.1	Welcome screen	Open the app while logged out.	You see a Welcome screen with "Sign Up" and "Login" buttons.	☐	
2.2	Open sign up	Tap "Sign Up".	Registration form opens with fields: first name, last name, email, password, referral code	☐	

#	Test case	Steps	Expected result	Status	Notes
			(optional), terms checkbox.		
2.3	Required fields validation	Leave all fields blank and tap "Create account".	Form shows validation errors for every required field.	[]	
2.4	Invalid email rejected	Enter an invalid email (e.g. abc) and submit.	Clear "invalid email" error is shown.	[]	
2.5	Weak password rejected	Enter a very short password (e.g. 12).	Password rule error is shown.	[]	
2.6	Terms must be accepted	Fill everything but do NOT tick the T&Cs checkbox.	Submit is blocked / an error asks you to accept terms.	[]	
2.7	Successful sign up	Fill valid details, accept terms, submit.	Account is created; you are taken to the next onboarding step (phone verification or role selection).	[]	
2.8	Duplicate email rejected	Sign up again using the same email.	Clear error: "account already exists" (or equivalent).	[]	

#	Test case	Steps	Expected result	Status	Notes
2.9	Referral code accepted	Sign up with a referral code a friend gives you.	Account is created successfully; referral is linked.	[]	

3. Login & Password Recovery

#	Test case	Steps	Expected result	Status	Notes
3.1	Login — wrong password	Log out, log in with correct email but wrong password.	Clear error ("invalid credentials" or similar); you stay on login.	[]	
3.2	Login — wrong email	Log in with an email that doesn't exist.	Clear error; no crash.	[]	
3.3	Login — valid credentials	Log in with correct email and password.	You land on the home map screen within a few seconds.	[]	
3.4	Stay logged in	Close the app fully, then reopen it.	App opens directly to the home screen — you should NOT be asked to log in again.	[]	

#	Test case	Steps	Expected result	Status	Notes
3.5	Forgot password — open screen	From login, tap "Forgot password?".	Reset screen opens with an email field.	[]	
3.6	Forgot password — submit	Enter your email and submit.	Success message shown; you receive a password reset email within a few minutes.	[]	
3.7	Forgot password — reset	Follow the link in the email and set a new password.	New password works on login.	[]	
3.8	Logout	From profile / drawer, tap Logout.	You are returned to the Welcome screen; reopening the app requires login.	[]	

4. Onboarding — Passenger

#	Test case	Steps	Expected result	Status	Notes
4.1	Passenger onboarding screen	After signup, choose the passenger	Welcome / intro screen is shown.	[]	

#	Test case	Steps	Expected result	Status	Notes
		path (if asked).			
4.2	Get started	Tap "Get Started".	You land on the home map screen as a passenger.	[]	

5. Onboarding — Driver

#	Test case	Steps	Expected result	Status	Notes
5.1	Driver onboarding — open	From the profile or driver flow, open driver onboarding.	Form is shown: license number, driving experience, license front & back photo upload.	[]	
5.2	Required fields validation	Try to submit empty form.	Errors are shown for each missing field.	[]	
5.3	Upload license — front	Tap to upload front of licence, pick a photo from gallery or camera.	Selected image appears in the form.	[]	

#	Test case	Steps	Expected result	Status	Notes
5.4	Upload license — back	Repeat for back of licence.	Image appears in the form.	[]	
5.5	Submit driver details	Fill everything and submit.	Submission succeeds; you are taken to the driver home / next step.	[]	
5.6	Driver status pending	After submission, check your profile.	Profile shows a "pending verification" (or similar) indicator if verification is required.	[]	

6. Profile

#	Test case	Steps	Expected result	Status	Notes
6.1	Open profile	From the drawer menu, tap "Profile".	Profile screen shows: avatar/initials, name, email, rating, vehicle count, wallet balance, availability toggle.	[]	
6.2	Open edit profile	Tap "Edit profile".	Edit form opens with:	[]	

#	Test case	Steps	Expected result	Status	Notes
			first name, last name, phone, date of birth.		
6.3	Edit first name	Change first name and save.	Changes saved; profile screen reflects the new name.	[]	
6.4	Edit last name	Change last name and save.	Changes saved and visible.	[]	
6.5	Edit phone number	Change phone number and save.	Number is saved; if phone re-verification is required, SMS flow starts again.	[]	
6.6	Set date of birth	Open date picker, pick a date, save.	Date of birth is stored and displayed.	[]	
6.7	Change photo (placeholder)	Tap "Change Photo".	Shows a "Coming Soon" message (known placeholder).	[]	
6.8	Ratings visible	On the profile screen, check your rating.	Star rating is visible (0 or higher).	[]	

7. Vehicle Management

#	Test case	Steps	Expected result	Status	Notes
7.1	Open vehicles list	From profile, open "My vehicles".	List shows your vehicles with make/model/plate/capacity (empty state if none).	[]	
7.2	Add new vehicle	Tap the "+" (add) button.	Add vehicle form opens.	[]	
7.3	Required fields	Try to submit an empty add-vehicle form.	Validation errors shown for required fields.	[]	
7.4	Pick category	Select a category (CAR, MOTORBIKE, VAN, BUS).	Category is set; rest of the form updates accordingly.	[]	
7.5	Upload vehicle photos	Add up to 4 photos.	All photos appear as thumbnails before saving.	[]	
7.6	Save vehicle	Fill all fields and save.	Vehicle appears in the list.	[]	
7.7	Edit vehicle	Tap a vehicle to edit.	Form opens pre-filled; changes save correctly.	[]	

#	Test case	Steps	Expected result	Status	Notes
7.8	Set rental pricing	On edit, fill in daily rate, hourly rate, security deposit, mileage limit, description.	All fields save; vehicle is available for rental browsing.	[]	
7.9	Delete vehicle (if available)	Delete a test vehicle.	Vehicle is removed from the list.	[]	

8. Home Map & Nearby Drivers (Passenger)

#	Test case	Steps	Expected result	Status	Notes
8.1	Home map loads	After login, land on home.	Google map loads showing your area.	[]	
8.2	Current location pin	Check your location on the map.	A pin / marker shows your current position with your address below.	[]	
8.3	Nearby drivers visible	Wait a few seconds.	Car and motorbike icons appear on the map for nearby drivers (if any are online).	[]	

#	Test case	Steps	Expected result	Status	Notes
8.4	Locate-me button	Scroll the map away, then tap the locate-me button.	Map recenters on your current position.	[]	
8.5	Search bottom sheet	Pull up the bottom sheet from the bottom of the screen.	Sheet expands to show search fields (pickup, destination, etc.).	[]	

9. Request a Ride (Passenger)

#	Test case	Steps	Expected result	Status	Notes
9.1	Set pickup	Tap the pickup field in the search sheet.	Location picker opens; you can search or use current location.	[]	
9.2	Set destination	Pick a destination.	Destination is set and shown in the form.	[]	
9.3	Pick vehicle type	Select CAR, MOTO, or BUS.	Choice is highlighted.	[]	
9.4	Set passenger count	Choose number of passengers (1–8).	Number is set; capacity shown.	[]	

#	Test case	Steps	Expected result	Status	Notes
9.5	Set proposed fare	Enter a proposed fare in RWF.	Amount accepted; formatted as currency.	[]	
9.6	Pick date / time	Pick a future date and time.	Date and time are set.	[]	
9.7	Submit request	Submit the ride request.	Request created; you see a "waiting for driver" / OPEN status screen.	[]	
9.8	Cancel open request	From the request screen, cancel the request.	Request status becomes cancelled; you return to home.	[]	
9.9	Driver accepts	Have a test driver accept your request from their app.	Your app navigates you to the ride details screen automatically.	[]	

10. Post / Search / Book Rides

10a. Post a Ride (Driver)

#	Test case	Steps	Expected result	Status	Notes
10.1	Open post ride	From the drawer, tap "Post a ride".	Multi-step form opens at Step 1 (Route).	[]	
10.2	Step 1 — Route	Enter origin, destination, date and time.	"Next" is enabled; moves to Step 2.	[]	
10.3	Step 2 — Vehicle	Pick a vehicle, seats, A/C toggle, smoking toggle.	"Next" is enabled.	[]	
10.4	Step 3 — Preferences	Set ride preferences (e.g. music, pets).	Selections saved; moves to Step 4.	[]	
10.5	Step 4 — Contribution	Set the price (fare), collection method (Direct / Via platform), booking type (Automatic / Manual).	Options save; moves to Step 5.	[]	
10.6	Step 5 — Review	Review all details on the	Everything you entered	[]	

#	Test case	Steps	Expected result	Status	Notes
		summary screen.	is shown correctly.		
10.7	Publish ride	Tap "Publish".	Ride is published; appears in "My rides" under PUBLISHED.	[]	

10b. Search & Book a Ride (Passenger)

#	Test case	Steps	Expected result	Status	Notes
10.9	Search results load	After submitting a ride request, open search results.	List of matching rides shown with driver, vehicle, times, price.	[]	
10.10	Filter P2P vs D2D	Toggle the ride type filter.	List updates to match the filter.	[]	
10.11	Infinite scroll	Scroll down the list.	More rides load automatically until exhausted.	[]	
10.12	Open ride details	Tap a ride card.	Ride details show driver info, vehicle, route, times, available seats, price.	[]	
10.13	Book a ride	Tap "Book".	Booking is created in	[]	

#	Test case	Steps	Expected result	Status	Notes
			PENDING state (or APPROVED if automatic).		
10.14	Booking appears in My rides	Open "My rides".	Your booking is listed with correct status.	[]	
10.15	Cancel booking	Cancel the booking.	Status updates to CANCELLED.	[]	

10c. Manage Bookings (Driver)

#	Test case	Steps	Expected result	Status	Notes
10.16	View bookings on ride	Open the ride details for a published ride.	List of passenger bookings shown with status.	[]	
10.17	Approve booking	Approve a PENDING booking.	Status becomes APPROVED; passenger is notified.	[]	
10.18	Decline booking	Decline a booking with a reason.	Status becomes DECLINED; passenger is notified.	[]	
10.19	Cancel ride	Cancel the whole ride	All bookings are cancelled;	[]	

#	Test case	Steps	Expected result	Status	Notes
		with a reason.	passengers are notified.		

11. Active Ride & Manifest

#	Test case	Steps	Expected result	Status	Notes
11.1	Start ride (driver)	On the ride details, tap "Start ride".	Ride moves to ONGOING; active ride screen opens.	[]	
11.2	Live map	On active ride screen.	Map shows live vehicle position and route.	[]	
11.3	ETA shown	Look at the ETA indicator.	Estimated minutes / arrival time is visible.	[]	
11.4	Call driver	Tap the phone icon (as passenger).	Device's phone dialer opens with driver's number.	[]	
11.5	Attendance code	View attendance code / QR on the ride.	Code / QR is visible.	[]	

#	Test case	Steps	Expected result	Status	Notes
11.6	Driver opens manifest	From active ride, open manifest.	List of passengers with boarding status.	[]	
11.7	Scan QR	Tap "Scan" on a passenger.	Camera opens; scanning their code marks them boarded.	[]	
11.8	Mark boarded manually	Without QR, tap "Mark boarded".	Status updates to boarded.	[]	
11.9	Complete ride	Driver taps "Complete".	Ride moves to COMPLETE D; completion screen opens for both parties.	[]	
11.10	Rate ride	Passenger rates 1–5 stars, adds comment, submits.	Thank-you / success shown; rating saved on driver's profile.	[]	
11.11	Skip rating	Alternatively tap "Skip".	Returns to home without rating.	[]	

12. Driver "Go Online" / Availability

#	Test case	Steps	Expected result	Status	Notes
12.1	Toggle availability ON	On profile, flip "Available for ride requests" to ON.	If you have multiple vehicles, picker asks which to use; confirmation shows you are online.	[]	
12.2	Appear on passenger map	From a second test device (passenger), view home map in your area.	Your driver icon is visible.	[]	
12.3	Receive ride requests	Have a passenger submit a matching ride request.	You receive a notification / see the request.	[]	
12.4	Toggle availability OFF	Flip the toggle to OFF.	You disappear from passenger maps within a short time.	[]	

13. Rentals

#	Test case	Steps	Expected result	Status	Notes
13.1	Browse rentals	Open the Rentals section.	List of rental vehicles with photos, make/model, category, capacity.	[]	
13.2	Open rental details	Tap a vehicle.	Full details: images, specs, rental type (Hourly / Daily), date pickers.	[]	
13.3	Pick rental type	Toggle Hourly and Daily.	Price and pickers update accordingly.	[]	
13.4	Pick dates	Choose start and end date (or start time + hours).	Dates are accepted; end must be after start.	[]	
13.5	Submit rental request	Submit.	Request is created and appears in "My rides" under the rental section.	[]	
13.6	Owner sees request	As vehicle owner, check notifications / rides.	Request is visible for acceptance.	[]	

#	Test case	Steps	Expected result	Status	Notes
13.7	Owner accepts / declines	Accept or decline request.	Renter is notified; status updates.	[]	
13.8	Rental completes	Mark rental complete at end of period.	Status becomes COMPLETE D; both parties can rate (if applicable).	[]	

14. Chauffeur Services

#	Test case	Steps	Expected result	Status	Notes
14.1	Driver opts in	On Chauffeur availability screen, toggle "Available for chauffeur", set hourly & daily rates, description.	Saved; driver now appears in chauffeur listings.	[]	
14.2	Requires driver onboarding	As a non-verified driver, try to opt in.	Prompt tells you driver onboarding is required first.	[]	
14.3	Browse chauffeurs	As a passenger, open	List of verified drivers with	[]	

#	Test case	Steps	Expected result	Status	Notes
		Chauffeur section.	rating, rates, availability.		
14.4	Open driver details	Tap a driver.	Profile with hourly / daily rates, description, availability, date pickers.	[]	
14.5	Book chauffeur	Choose service type (hourly / daily), pick dates, submit.	Request is created; visible under "My rides" chauffeur tab.	[]	
14.6	Driver accepts	From the driver's side, accept the service.	Status becomes ACCEPTED; passenger is notified.	[]	
14.7	Start service	Driver marks active.	Status becomes ACTIVE.	[]	
14.8	Complete service	Driver marks complete.	Status becomes COMPLETE D; rating flow available.	[]	
14.9	Decline service	As driver, decline a request.	Status becomes DECLINED; passenger is notified.	[]	

15. Ride History ("My Rides")

#	Test case	Steps	Expected result	Status	Notes
15.1	Open My Rides	From the drawer, tap "Rides".	Lists show passenger bookings, driver rides, and chauffeur services with the correct status badges.	[]	
15.2	Filter by status	If filters are available, filter by status.	List updates correctly.	[]	
15.3	Tap a past ride	Open any past ride.	Correct details are shown (history preserved).	[]	
15.4	Empty state	As a brand new user, open the screen.	Friendly empty-state message is shown.	[]	

16. Chat / Messaging

#	Test case	Steps	Expected result	Status	Notes
16.1	Open chat tab	From the drawer, open Chat.	List of threads with avatars,	[]	

#	Test case	Steps	Expected result	Status	Notes
			names, last message, unread count.		
16.2	Open a thread	Tap a thread.	Messages load in order; your messages are on the right, others on the left; timestamps visible.	[]	
16.3	Send a message	Type a message, send.	Message appears instantly in the thread.	[]	
16.4	Real-time delivery	With a second test device, reply.	New message appears on your screen in near real time without pulling to refresh.	[]	
16.5	Mark as read	Enter a thread with an unread message.	Unread badge clears; message shows as read on the sender's side.	[]	
16.6	Deep link from ride	From a ride details screen, tap "Chat".	Opens the chat thread linked to that ride.	[]	

#	Test case	Steps	Expected result	Status	Notes
16.7	Deep link from ride request	From a ride request, tap chat.	Opens the relevant thread.	[]	
16.8	Keyboard behaviour	Open a long thread, tap the input.	Keyboard opens; input stays visible above the keyboard; list scrolls correctly.	[]	

17. Notifications

#	Test case	Steps	Expected result	Status	Notes
17.1	Notification centre	Open the notification icon / screen.	List of notifications with type, time, unread badge.	[]	
17.2	Unread count	Check the bell / drawer badge.	Badge count matches the number of unread items.	[]	
17.3	Tap a notification	Tap a notification (e.g. "ride accepted").	App navigates straight to the relevant screen (ride / chat / booking).	[]	
17.4	Mark all as read	Tap "Mark all read".	All unread badges clear.	[]	

#	Test case	Steps	Expected result	Status	Notes
17.5	Push notification — foreground	With app open, trigger a notification from another device.	Notification appears as a banner or in the centre; tapping it navigates correctly.	[]	
17.6	Push notification — background	Close the app fully, trigger a notification.	Push arrives on the lock screen; tapping opens the app on the correct screen.	[]	

18. Wallet & Transactions

#	Test case	Steps	Expected result	Status	Notes
18.1	Open wallet	From the drawer, open Wallet.	Shows current balance (RWF), debt limit, available funds, recent activity.	[]	
18.2	Transactions list	Open Transactions.	List of all transactions with type, amount, date/time, and status	[]	

#	Test case	Steps	Expected result	Status	Notes
			badge (PENDING / COMPLETED / FAILED / REFUNDED) .		
18.3	Transaction status colours	Review several transactions.	Status colours are consistent and legible.	[]	
18.4	Empty state	With no activity, open the screen.	Friendly empty-state is shown.	[]	

Known gap — confirm with team: top-up, payment method picker and driver payout flows are not yet exposed in the mobile UI and should be treated as out of scope for this round.

19. Maps & Location (cross-cutting)

#	Test case	Steps	Expected result	Status	Notes
19.1	Location picker — search	Open any location picker (ride request, post ride).	Typing shows Google Places suggestions.	[]	
19.2	Location picker — use current location	Tap "Use my location".	Current location is used as the value.	[]	
19.3	Permission denied	Revoke location	App prompts / informs you	[]	

#	Test case	Steps	Expected result	Status	Notes
		permission in phone settings, re-open the app.	that location is required; no crash.		
19.4	Live tracking accuracy	During an active ride, watch the live position.	Position updates reasonably (not frozen) on both driver and passenger screens.	[]	

20. Deep Linking

#	Test case	Steps	Expected result	Status	Notes
20.1	Open a ride link	Tap a <code>yourdrive://ride/...</code> link sent from another app (e.g. WhatsApp).	App opens directly to that ride.	[]	
20.2	Open a chat link	Tap a <code>yourdrive://chat/...</code> link.	App opens directly to that chat thread.	[]	
20.3	Open while logged out	Tap a deep link while not logged in.	App asks you to log in first, then routes to	[]	

#	Test case	Steps	Expected result	Status	Notes
			the intended screen.		

23. Error Handling & Recovery

#	Test case	Steps	Expected result	Status	Notes
22.1	Server error	Trigger a known failure (e.g. post ride with backend down).	Clear error message; no raw technical output; no crash.	[]	
22.2	Slow network	Throttle network to 3G; load any list.	Loading indicator shown; screen eventually loads or shows a clear error.	[]	
22.3	Force-close during action	Close the app mid-action (e.g. while posting a ride).	Reopening the app returns you to a sensible screen with no corrupted data.	[]	
22.4	Global error boundary	Trigger any unexpected error.	A friendly fallback screen appears instead of a	[]	

#	Test case	Steps	Expected result	Status	Notes
			white screen or crash.		

24. Sign-off
